

## **Nicole McDonald, NP-PHC, MN**

Bio:

I've been a nurse for 22 years with the last five as a nurse practitioner in palliative care in the community. I have had the opportunity to nurse across diverse practice settings in Canada and the US including acute care, public health, community care, and primary care. It is a privilege to be part of RNAO to advocate with a large number of Ontario nurses for better patient care and outcomes through healthy public policy and nursing excellence.
