

- No evidence of SARS-CoV-2
- SARS-CoV-2 detected
- Confirmatory test required

Molecular Point-of-Care Testing Guidance (e.g., ID NOW™, GeneXpert®)**

* Consideration should be given to clinical and/or exposure history, disease prevalence in the community, and the risk/vulnerability of the population to determine if confirmatory testing is warranted in these scenarios.

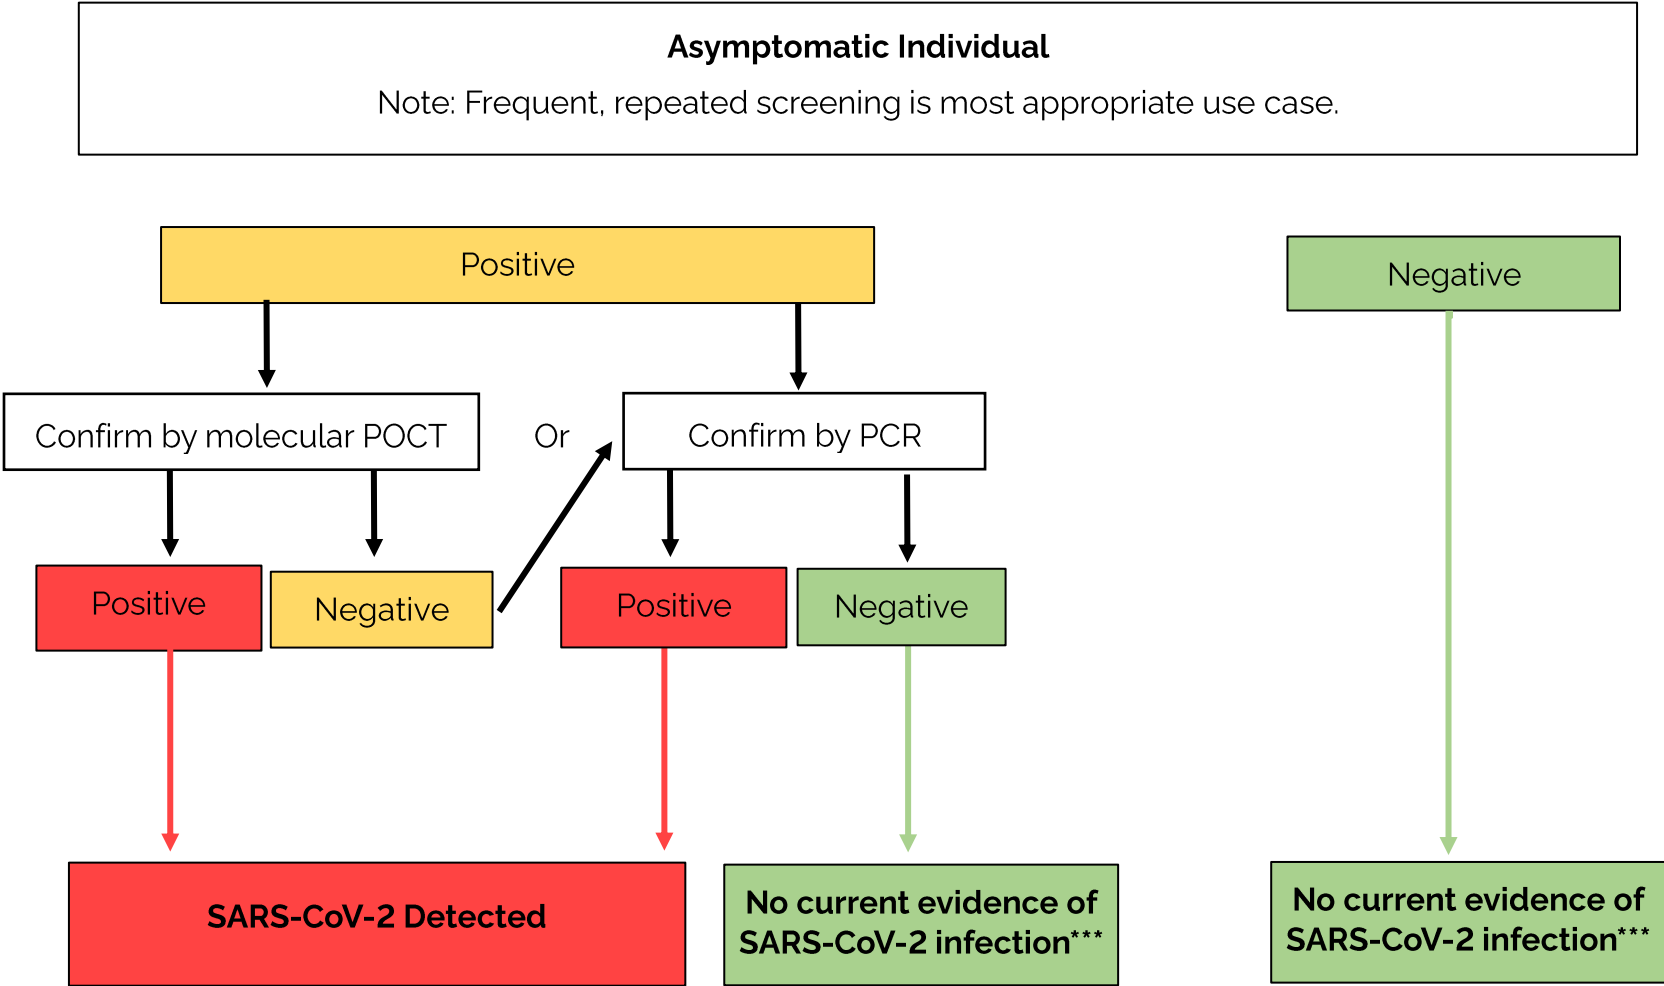

**When GeneXpert is used as a validated test in a licensed laboratory, confirmatory testing is not required.

*** Continue to adhere to public health and infection prevention and control measures

Antigen Point-of-Care Testing Guidance (e.g., Panbio™, BD Veritor™)

And Self-Testing Guidance (e.g., Lucira™)

- No evidence of SARS-CoV-2
- SARS-CoV-2 detected
- Confirmatory test required

*** Continue to adhere to public health and infection prevention and control measures
